

Enteric Infectious Disease (Qualitative) Virus Test 6 Items

Name: H.pylori Antigen Detection Kit (Lateral Flow Method)

Model: YC-CH0111

Certificate: ISO13485:2016, CE

Sample Type: Human Fecal

Packing Specification: 1 Test/Kit, 20 Tests/Kit

Application: Rapid screening of H.pylori antigen through fecal sample without equipment within 15 minutes to determine whether the suspected infection with H.pylori

Name: H.pylori IgG Detection Kit (Lateral Flow Method)

Model: YC-CH221

Certificate: ISO13485:2016, EC Declaration of Conformity

Sample Type: Whole blood, Plasma, Serum

Packing Specification: 1 Test/Kit, 20 Tests/Kit

Application: Rapid screening of H.pylori antibody through fecal sample without equipment within 15 minutes to determine whether the suspected infection with H.pylori .

Name: Fecal Occult Blood Antigen Detection Kit (Lateral Flow Method)

Model: YC-CF0311

Certificate: ISO13485:2016, EC Declaration of Conformity

Sample Type: Human Fecal

Packing Specification: 1 Test/Kit, 20 Tests/Kit

Application: Fecal occult blood can be quickly screened within 15 minutes through fecal samples without equipment to determine whether the infection is suspected.

Name: Rotavirus Antigen Detection Kit (Lateral Flow Method)

Model: YC-CR0411

Certificate: ISO13485:2016, EC Declaration of Conformity

Sample Type: Human Fecal

Packing Specification: 1 Test/Kit, 20 Tests/Kit

Application: A fecal sample is quickly screened for rotavirus within 15 minutes without equipment to determine whether rotavirus disease is suspected.

Name: Norovirus Antigen Detection Kit (Lateral Flow Method)

Model: YC-CN0511

Certificate: ISO13485:2016, EC Declaration of Conformity

Sample Type: Human Fecal

Packing Specification: 1 Test/Kit, 20 Tests/Kit

Application: A fecal sample can be quickly screened for norovirus within 15 minutes without equipment to identify suspected norovirus disease.

Name: Enterovirus 71 IgM (EV71-IgM) Detection Kit (Lateral Flow Method)

Model: YC-CES1511

Certificate: ISO13485:2016, CE

Sample Type: Whole blood, Plasma, Serum

Packing Specification: 1 Test/Kit, 20 Tests/Kit

Application: A blood sample is taken to quickly screen for Enterovirus 71 IgM within 15 minutes without equipment to determine whether a person is suspected to have been infected with enterovirus 71 disease.
