

Marine Biology and Aquaculture (Quantitative) Virus Test 12 Items

Name: Abalone Haliotid Herpesvirus 1 Virus (HaHV-1) Detection Kit
Model: YC-HHD117101
Certificate:ISO13485:2016
Sample Type: Abalone membrane, Gill, Hepatopancreas
Packing Specification: 5 Tests/Kit, 20 Tests/Kit
Application: By sampling abalone membrane, gill and hepatopancreas samples, rapid screening of HaHV-1 within 15 minutes without equipment, to determine whether suspected infection with HaHV-1.

Name: Shrimp White Spot Syndrome Virus (WSSV) Detection Kit
Model: YC-HWD117102
Certificate:ISO13485:2016
Sample Type: About 0.1 g sick shrimp muscle
Packing Specification: 5 Tests/Kit, 20 Tests/Kit
Application: By sampling about 0.1 grams of muscle sample of sick shrimp, we can quickly screen for WSSV within 15 minutes without equipment and determine whether it is suspected to be infected with WSSV.

Name: Infectious Hypodermal Haematopoietic Necrosis Virus(IHHNV) Detection Kit
Model: YC-HID117103
Certificate:ISO13485:2016
Sample Type: Shrimp seedlings, Shrimp feces
Packing Specification: 5 Tests/Kit, 20 Tests/Kit
Application: By sampling shrimp seedlings and shrimp feces samples, rapid screening of IHHNV within 15 minutes without equipment, to determine whether the suspected infection of IHHNV.

Name: Shrimp Yellow Head Virus(YHV) Detection Kit
Model: YC-HYD117104
Certificate:ISO13485:2016
Sample Type: Tissue homogenate
Packing Specification: 5 Tests/Kit, 20 Tests/Kit
Application: By sampling the serum and tissue homogenate samples of shrimp, rapid screening of YHV within 15 minutes without the need of equipment, to determine whether the suspected infection of YHV.

Name: Shrimp Taura Syndrome Virus (TSV) Detection Kit
Model: YC-HTD117105
Certificate:ISO13485:2016
Sample Type: Shrimp tissue
Packing Specification: 5 Tests/Kit, 20 Tests/Kit
Application: By sampling shrimp tissue samples, we can quickly screen for infection with TSV within 15 minutes without equipment, and determine whether it is suspected to be infected with TSV.

Name: Shrimp Infectious Myonecrosis Virus (IMNV) Detection Kit
Model: YC-HID117106
Certificate:ISO13485:2016
Sample Type: Shrimp tissue
Packing Specification: 5 Tests/Kit, 20 Tests/Kit
Application: By sampling shrimp tissue samples, we can quickly screen for infection with IMNV within 15 minutes without equipment, and determine whether it is suspected to be infected with IMNV.

Name: Shrimp *Penaeus orientalis* Acute hepatopancreatic necrosis disease causing *Vibrio parahaemolyticus* (VpAHPND) Detection Kit
Model: YC-HPD117107
Certificate:ISO13485:2016
Sample Type: Shrimp tissue
Packing Specification: 5 Tests/Kit, 20 Tests/Kit
Application: Sampling shrimp tissue samples, without instruments, Can quickly screen *Vibrio parahaemolyticus* (VpAHPND) of shrimp acute hepatopancreatic necrosis disease within 15 minutes to determine whether it is suspected to be infected with *Vibrio parahaemolyticus* virus.

Name: Shrimp *Penaeus orientalis* Enterocytozoon hepatopenaei(EHP) Detection Kit
Model: YC-HED117108
Certificate:ISO13485:2016
Sample Type: Shrimp tissue
Packing Specification: 5 Tests/Kit, 20 Tests/Kit
Application: By sampling the serum, plasma and tissue homogenate of shrimp, and rapidly screening EHP within 15 minutes without equipment, the suspected infection of EHP was determined.

Name: Shrimp Decapod Iridescent Virus 1 (DIV1) Detection Kit
Model: YC-HDD117109
Certificate:ISO13485:2016
Sample Type: Shrimp seedlings
Packing Specification: 5 Tests/Kit, 20 Tests/Kit
Application: By sampling shrimp seedlings, we can quickly screen for DIV1 within 15 minutes without equipment and determine whether it is suspected to be infected with DIV1.

Name: Ostreid herpesvirus 1(OSHV-1) Detection Kit
Model: YC-HHD117110
Certificate: ISO13485:2016
Sample Type: Bivalvia membrane, Gill, Hepatopancreas
Packing Specification: 5 Tests/Kit, 20 Tests/Kit
Application: By sampling Bivalvia membrane, gill and hepatopancreas samples, rapid screening of OSHV-1 within 15 minutes without equipment, to determine whether the suspected infection of OSHV-1.

Name: Koi Herpesvirus (KHV) Detection Kit
Model: YC-HKD117111
Certificate:ISO13485:2016
Sample Type: Koi adult fish, fish seedlings
Packing Specification: 5 Tests/Kit, 20 Tests/Kit
Application: By sampling koi adult fish and seedlings samples, rapid screening of KHV within 15 minutes without equipment, to determine whether suspected infection with KHV.

Name: Koi Viral Nervous Necrosis Virus (VNNV) Detection Kit
Model: YC-HVD117112
Certificate:ISO13485:2016
Sample Type: Koi adult fish, fish seedlings
Packing Specification: 5 Tests/Kit, 20 Tests/Kit
Application: By sampling Koi adult fish and seedlings samples, rapid screening of VNNV within 15 minutes without equipment, to determine whether suspected infection with VNNV.
