

Pet Infectious Diseases of Cats (Qualitative) 6 Items

Name: Feline Calicivirus Antigen (FCV-Ag) Detection Kit
Model: YC-CCF116101 **Certificate:** ISO13485:2016
Sample Type: Feline eye conjunctival secretion, Nasal fluid, Saliva
Packing Specification: 5 Tests/Kit, 20 Tests/Kit
Application: By sampling feline eye conjunctival secretion, nasal fluid, saliva, rapid screening of Feline Calicivirus antigen within 15 minutes without equipment, to determine whether the cat is infected with calicivirus.

Name: Feline Calicivirus Antibody (FCV-Ab) Detection Kit
Model: YC-CCF2220102 **Certificate:** ISO13485:2016
Sample Type: Whole blood, Plasma, Serum
Packing Specification: 5 Tests/Kit, 20 Tests/Kit
Application: By sampling feline whole blood, plasma and serum, rapid screening of feline calicivirus antibodies within 15 minutes without equipment, to determine whether the infection of feline calicivirus or feline calicivirus vaccine surveillance.

Name: Feline Herpesvirus Antigen (FHV-Ag) Detection Kit
Model: YC-CCF116103 **Certificate:** ISO13485:2016
Sample Type: Eye secretions, Nasal fluids, Saliva
Packing Specification: 5 Tests/Kit, 20 Tests/Kit
Application: By sampling eye secretions, nasal fluid or saliva, rapid screening of feline herpesvirus antigen within 15 minutes without equipment, to determine whether the feline herpes virus infection.

Name: Feline Herpesvirus Antibody (FHV-Ab) Detection Kit
Model: YC-CCF2220104 **Certificate:** ISO13485:2016
Sample Type: Whole blood, Plasma, Serum
Packing Specification: 5 Tests/Kit, 20 Tests/Kit
Application: By sampling feline whole blood, plasma and serum, rapid screening of feline herpesvirus antibodies within 15 minutes without equipment, to determine whether the infection of feline herpes virus or feline herpes virus vaccine surveillance.

Name: Feline Plaguevirus Antigen (FPV-Ag) Detection Kit
Model: YC-CCF116105 **Certificate:** ISO13485:2016
Sample Type: Feline feces, Rectum
Packing Specification: 5 Tests/Kit, 20 Tests/Kit
Application: By sampling feline feces and rectum samples, rapid screening of feline plaguevirus antigen within 15 minutes without equipment, to determine whether the feline plaguevirus infection.

Name: Feline Plaguevirus Antibody (FPV-Ab) Detection Kit
Model: YC-CCF2220106 **Certificate:** ISO13485:2016
Sample Type: Whole blood, Plasma, Serum
Packing Specification: 5 Tests/Kit, 20 Tests/Kit
Application: By sampling whole blood, plasma and serum, rapid screening of feline plaguevirus antibodies within 15 minutes without equipment, to determine whether the cat has been infected with feline plaguevirus or feline plaguevirus vaccine monitoring.
